EQUIPMENT SUPPLIES

SEE ALL Wide-Angle Convex Plexiglas Acrylic Mirrors

Lightweight, virtually unbreakable SEE ALL Wide-Angle Convex Plexiglas Acrylic Mirrors should be used where glass mirrors are not permitted for safety reasons.

Ideal for use in hospitals, nursing homes, and food processing plants. Prevent accidents and increase surveillance with a wide, 160° angle mirror. Offer superior reflectivity for a sharper, brighter image, while the wide angle allows for a crisp view around obstacles. Does not detract from reflection. Also feature expertly engineered curves to eliminate distortion and long-lasting sturdy construction for a better fit and finish. Includes 8" mounting bracket (12" and 18" dia.) or 26" mounting channel (26-48" dia.). Indoor mirrors have high-quality tempered hardboard backing. Outdoor mirrors feature waterproof rubber seals, high-quality ABS plastic backing to resist the elements, strong vinyl-coated aluminum edging, and dual mounting channels.

SEE ALL Wide-Angle Convex High-Visibility Plexiglas Acrylic Mirrors

SEE ALL Wide-Angle Convex High-Visibility Plexiglas Acrylic Mirrors feature an easy-to-see red and white border stands out against any background.

SEE ALL Half-Dome Panoramic Mirrors

SEE ALL Half Dome Panoramic Mirrors offer 180° visibility from two directions.

Smooth-coated surfaces offer superior reflectivity to help prevent accidents and increase surveillance. Engineered curves eliminate distortion. Half-dome mirrors feature a rigid foam backing to ensure the mirror will hold its shape and mount easily with hook-and-spring method. Also available in an outdoor version featuring galvanized backing and Protecto-Kote scratch-resistant coating. Include instructions and mounting wires—no tools required for installation.

SEE ALL Quarter-Dome Panoramic Mirrors

SEE ALL Quarter Dome Panoramic Mirrors offer 90° of viewing from either direction.
