

## RUBBERMAID Landmark Series Plastic Stone Panel Receptacles with Dome Tops

Feature upscale contours and pebbled texture that blend well with most environmental designs. Ideal for outdoor applications. Includes rigid plastic liner for easy emptying of refuse, river rock sides with plastic sable trim, and hinged rain-hood dome with stay-open support straps.

## RUBBERMAID Ranger Receptacles

RUBBERMAID Ranger Receptacle features a structural web material that includes a textured surface that helps minimize the appearance of scratches. Includes integrated hinged lid that stays attached to container for easier liner removal. Metal bag retention straps keep can liners in place. FM- and CSFM-approved. 45-gallon containers have a pedestal base ring. Optional weighted base can be bolted down. Shown with optional weighted base, sold separately.

## RUBBERMAID Steel Stone Panel Receptacles

Feature a class A fire rating and comply with ADA standards. Stone panel receptacles contain over 30% recycled steel.

Removable one-piece sand tops. 38-gallon models have a hinged top. All models include Germ-Fighter antimicrobial, rigid plastic liners. 15-year limited warranty. UV-stabilized powder coated finish. Optional retrofit weather urn tops with self-contained cigarette depository convert your existing sand urn into an enclosed ash receptacle; available on some models. All receptacles, except 38-gallon receptacles, ship via small package carrier.

## RELIUS SOLUTIONS Expanded Metal Containers

Parks, bus stops, school yards are just a few of the places you might see these durable RELIUS SOLUTIONS Expanded Metal Containers. Super-strong units include expanded metal sides that are welded to vertical support ribs for increased rigidity. The metal basket is also welded to the bottom outer edge for increased support. Base has drain holes to prevent fluid buildup and the top edges are curled for safe handling. Choose either colored containers with powder-coat finish or hot-dipped galvanized units that resist rust and corrosion. Shown with optional top, sold separately.

## Thermoplastic Coated Outdoor Receptacles

Thermoplastic Coated Outdoor Receptacles look great anywhere from parks to corporate grounds. Virtually indestructible construction. Completely rust-resistant unit includes a galvanized lip and plastic liner.
