

We're changing the way you look at fluorescent lighting.

Fluorescent lighting offers the benefits of long life and is a great alternative to incandescent light bulbs. With so many choices, you'll see why using fluorescent lighting in your home or office is smarter than ever.

We have more halogens than most companies have light bulbs.

Westinghouse offers a comprehensive line of halogen light bulbs. In fact, we offer over 200 different kinds—the widest variety available from a single source. Look into our newest and most popular line of Halogen Lamps, which offers the benefits of halogen lighting in the familiar shapes of incandescent reflector light bulbs.

Our incandescent line covers the entire spectrum.

With so many different shapes, sizes and finishes, this line of light bulbs truly reflects our range and versatility. In fact, we offer one of the most comprehensive lines of incandescent light bulbs available anywhere. From incandescent Specialty light bulbs to traditional household light bulbs, we have the exact one you need.

With our energy saving light bulbs, you'll save time, money – and protect the environment.

Compared to traditional incandescent light bulbs, Westinghouse [ENERGY STAR®](#) light bulbs use less energy, reduce your electric bills and last longer. Take a look at our compact fluorescent lamps (CFL's)—the most comprehensive line of energy-saving light bulbs in our collection.
